

MEAL CHARGING POLICY

VALLEY SCHOOL DISTRICT #262

It is the policy of the Valley School District and the Foods Service Department to feed all students regardless of ability to pay.

However, those that don't qualify for a free lunch are still responsible to pay school lunch fees. To reach this goal the following policy is in place.

If a family or individual student account has a negative balance the parents will receive a bill stating the negative balance.

The next step made by the food service director will be a phone call. It will be decided by the Food Service Director and school administrators how many calls will be attempted.

If there is still no effort made by the parents to communicate with the school, the negative balance may be turned over to a debt collection company.
